Notes on the HMRSC VI Field Excursions

Hubertus L. Bloemer
Department of Geography, Ohio University, Athens, Ohio, USA

Hailu Araya
Department of Geography, Addis Ababa University, Ethiopia

Figure 1: Sketch map showing the route of both HMRSC VI field excursions.
Figure 2: View from the top of the escarpment of the Rift Valley near T’armaber Pass down to the next fault block.

Figure 3: A participant of the field excursion is climbing a dyke near the T’armaber Pass.

Figure 4: Waterfall at the Wabe River near Assasa.
Figure 5: Rough road conditions north of Assasa often cause flat tires.

Figure 6: Furrows and ridges caused by cryogenic processes on a slope, Sanetti Plateau at 3870 m.
Figure 7: View from a lower level of the Sanetti Plateau towards Tulu Dimtu (4307 m) which is covered by a thin layer of snow. Giant lobelias can be seen in the foreground.

Figure 8: Wabe River disappears into the Sof Oumer cave system.
Figure 9: A group of Ethiopian children at the road side.

Figure 10: Corn is cooked in natural hot springs at the shore side of Lake Shalla.
